

ICT and Internet Acceptable Use Policy

St Andrew's Church of England Primary School

We believe that 'Everyone is different. Everyone is special. Everyone is our neighbour.' As Jesus taught us to love unconditionally, so we strive to nurture respect for all; to provide a rich and stimulating curriculum that considers the individual; and to care for the intellectual, social and spiritual well-being of our whole school community - encouraging positive engagement with the wider world, as affirmed through our school values and parable of the Good Samaritan.

Jesus said, "Love the Lord your God ..." and, "Love your neighbour as yourself." Luke 10:27

At St Andrew's we are committed to keeping pupils and staff safe. Our school policies are an essential part of the way we safeguard all members of our diverse school. We support democracy, the rule of law, individual liberty, mutual respect and tolerance of different faiths and beliefs. These principles help us to listen to each other and learn from each other to create a safe and rich learning environment for pupils and staff alike

1. Introduction and aims

Information and communications technology (ICT) is an integral part of the way our school works, and is a critical resource for pupils, staff (including the senior leadership team), governors, volunteers and visitors. It supports teaching and learning, and the pastoral and administrative functions of the school.

However, the ICT resources and facilities our school uses could also pose risks to data protection, online safety and safeguarding.

This policy aims to:

- › Set guidelines and rules on the use of school ICT resources for staff, pupils, parents/carers and governors
- › Establish clear expectations for the way all members of the school community engage with each other online
- › Support the school's policies on data protection, online safety and safeguarding
- › Prevent disruption that could occur to the school through the misuse, or attempted misuse, of ICT systems
- › Support the school in teaching pupils safe and effective internet and ICT use

This policy covers all users of our school's ICT facilities, including governors, staff, pupils, volunteers, contractors, visitors, and anyone who has access to our IT and communication systems.

Misuse of IT and communications systems can damage our school and our reputation. Breaches of this policy may be dealt with under other relevant policies, such as the Staff Code of Conduct and Behaviour & Relationships Policy.

2. Relevant legislation and guidance

This policy refers to, complies with, or otherwise has regard to, the following legislation and guidance:

- › [Data Protection Act 2018](#)
- › The UK General Data Protection Regulation (UK GDPR) – the EU GDPR was incorporated into UK legislation, with some amendments, by [The Data Protection, Privacy and Electronic Communications \(Amendments etc\) \(EU Exit\) Regulations 2020](#)
- › [Data \(Use and Access\) Act 2025](#)
- › [Computer Misuse Act 1990](#)
- › [Human Rights Act 1998](#)
- › [The Telecommunications \(Lawful Business Practice\) \(Interception of Communications\) Regulations 2000](#)
- › [Education Act 2011](#)
- › [Freedom of Information Act 2000](#)
- › [Education and Inspections Act 2006](#)
- › [Keeping Children Safe in Education 2025](#)
- › [Searching, screening and confiscation: advice for schools 2022](#)
- › [National Cyber Security Centre \(NCSC\): Cyber Security for Schools](#)
- › [Education and Training \(Welfare of Children\) Act 2021](#)
- › [Meeting digital and technology standards in schools and colleges](#)

3. Definitions

- › **ICT facilities:** all facilities, systems and services including, but not limited to, network infrastructure, desktop computers, laptops, tablets, phones, music players or hardware, software, websites, web applications or services, and any device system or service that may become available in the future which is provided as part of the school's ICT service
- › **Users:** anyone authorised by the school to use the school's ICT facilities, including governors, staff, pupils, volunteers, contractors and visitors
- › **Personal use:** any use or activity not directly related to the users' employment, study or purpose agreed by an authorised user
- › **Authorised personnel:** employees authorised by the school to perform systems administration and/or monitoring of the ICT facilities
- › **Materials:** files and data created using the school's ICT facilities including but not limited to documents, photos, audio, video, printed output, web pages, social networking sites and blogs

See appendix 5 for a glossary of cyber security terminology.

4. Unacceptable use

The following is considered unacceptable use of the school's ICT facilities. Any breach of this policy may result in disciplinary or behaviour proceedings (see section 4.2 below).

Unacceptable use of the school's ICT facilities includes:

- › Using the school's ICT facilities to breach intellectual property rights or copyright
- › Using the school's ICT facilities to bully or harass someone else, or to promote unlawful discrimination

- › Breaching the school's policies or procedures
- › Any illegal conduct, or statements which are deemed to be advocating illegal activity
- › Online gambling, inappropriate advertising, phishing and/or financial scams
- › Accessing any web page or downloading any image, document, application, or file from the internet which could be regarded as illegal, offensive, discriminatory, in bad taste, or immoral
- › Accessing, creating, storing, linking to or sending material that is pornographic, offensive, obscene or otherwise inappropriate or harmful
- › Consensual and non-consensual sharing of nude and semi-nude images and/or videos and/or livestreams
- › Activity which defames or disparages the school, or risks bringing the school into disrepute
- › Sharing confidential information about the school, its pupils, or other members of the school community
- › Using the school's systems to participate in internet chat rooms, post on internet message boards or blogs, unless approved by authorised personnel
- › Connecting any device to the school's ICT network without approval from authorised personnel
- › Setting up any software, applications or web services on the school's network without approval by authorised personnel, or creating or using any programme, tool or item of software designed to interfere with the functioning of the school's ICT facilities, accounts or data
- › Gaining, or attempting to gain, access to restricted areas of the internet and network, or to any password-protected information, without approval from authorised personnel
- › Allowing, encouraging or enabling others to gain (or attempt to gain) unauthorised access to the school's ICT facilities
- › Causing intentional damage to the school's ICT facilities
- › Removing, deleting or disposing of the school's ICT equipment, systems, programmes or information without permission from authorised personnel
- › Causing a data breach by accessing, modifying, or sharing data (including personal data) to which a user is not permitted by authorised personnel to have access, or without authorisation
- › Using inappropriate or offensive language
- › Promoting a private business, unless that business is directly related to the school
- › Using websites or mechanisms to bypass the school's filtering or monitoring mechanisms
- › Engaging in content or conduct that is radicalised, extremist, racist, antisemitic or discriminatory in any other way

This is not an exhaustive list. The school reserves the right to amend this list at any time. The Headteacher will use their professional judgement to determine whether any act or behaviour not on the list above is considered unacceptable use of the school's ICT facilities.

4.1 Exceptions from unacceptable use

Where the use of school ICT facilities (on the school premises and/or remotely) is required for a purpose that would otherwise be considered an unacceptable use, exemptions to the policy may be granted at the headteacher's discretion.

4.2 Sanctions

Pupils and staff who engage in any of the unacceptable activities listed above may face disciplinary action in line with the school's policies on Staff Code of Conduct and Behaviour & Relationships Policy, found on the school website.

5. Staff (including governors, volunteers, and contractors)

5.1 Access to school ICT facilities and materials

The school's business manager, with support from Turn it On, manages access to the school's ICT facilities and materials for school staff. That includes, but is not limited to:

- › Computers, tablets, mobile phones and other devices
- › Access permissions for certain programmes or files

Staff will be provided with unique login/account information and passwords that they must use when accessing the school's ICT facilities.

Staff who have access to files that they are not authorised to view or edit, or who need their access permissions updated or changed, should contact the school business manager.

5.1.1 Use of school-supplied equipment

School-issued devices (including laptops, tablets and other digital devices) are provided to staff for the purpose of supporting teaching, learning and the efficient running of the school. All school-supplied equipment remains the property of the school and staff must return the equipment at the end of employment, or when it is no longer required. Staff must:

- › Use equipment and devices primarily for school purposes and in line with the school's policies on safeguarding, data protection and confidentiality
- › Store devices securely when not in use, particularly when travelling. Devices should not be left unattended in public places or in unsecured locations
- › Be actively aware of data security and confidentiality and follow best practice when accessing the equipment away from school. E.g. when travelling on public transport, be aware that other passengers may be able to read any documents displayed on the screen of your device
- › Lock devices with a password when unattended. Passwords must:
 - Not be shared with others and must be changed regularly
 - Be suitably strong, in accordance with the school's password policy (see section [8.1])
 - Not be reused across multiple accounts
- › Update software, operating systems and applications when prompted, or as directed by Turn it On, ICT manager.
- › Connect to the school network using approved and secure methods. When connecting to wi-fi networks outside of the school, staff must ensure connections are secure and avoid transmitting sensitive data over public or unsecured networks
- › Report any loss, theft, damage or compromise of a school device promptly to Turn it On (ICT manager) designated safeguarding lead and data protection officer

5.1.2 Use of phones and email

The school provides each member of staff with an email address.

This email account should be used for work purposes only. Staff must make sure multi-factor authentication is enabled on their email account(s).

All work-related business should be conducted using the email address the school has provided.

Staff must not share their personal email addresses with parents/carers and pupils, and must not send any work-related materials using their personal email account.

Staff must take care with the content of all email messages, as incorrect or improper statements can give rise to claims for discrimination, harassment, defamation, breach of confidentiality or breach of contract.

Email messages are required to be disclosed in legal proceedings or in response to subject access requests from individuals under the UK GDPR and the Data Protection Act 2018 in the same way as paper documents. Deletion from a user's inbox does not mean that an email cannot be recovered for the purposes of disclosure. All email messages should be treated as potentially retrievable.

Staff must take extra care when sending sensitive or confidential information by email. Any attachments containing sensitive or confidential information should be encrypted using a strong, state-of-the-art encryption standard so that the information is only accessible by the intended recipient.

If staff receive an email in error, the sender should be informed and the email deleted. If the email contains sensitive or confidential information, the user must not make use of that information or disclose that information.

If staff send an email in error that contains the personal information of another person, they must inform the school business manager immediately and follow our data breach procedure.

Staff must not give their personal phone number(s) to parents/carers or pupils. In circumstances where staff are provided with phones, these staff must use the phones provided by the school to conduct all work-related business.

School phones must not be used for personal matters.

Staff who are provided with mobile phones as equipment for their role must abide by the same rules for ICT acceptable use as set out in section 4

5.2 Personal use

Staff are permitted to occasionally use school ICT facilities for personal use, subject to certain conditions set out below. This permission must not be overused or abused. The Headteacher may withdraw or restrict this permission at any time and at their discretion.

Personal use is permitted provided that such use:

- › Does not take place during non-break time
- › Does not constitute 'unacceptable use', as defined in section 4
- › Takes place when no pupils are present
- › Does not interfere with their jobs, or prevent other staff or pupils from using the facilities for work or educational purposes

Staff may not use the school's ICT facilities to store personal, non-work-related information or materials (such as music, videos or photos).

Staff should be aware that use of the school's ICT facilities for personal use may put personal communications within the scope of the school's ICT monitoring activities (see section 5.5). Where breaches of this policy are found, disciplinary action may be taken.

Staff may not store any school-related data on personal devices, on cloud storage or on personal removable storage devices.

Staff should be aware that personal use of ICT (even when not using school ICT facilities) can impact on their employment by, for instance, putting personal details in the public domain, where pupils and parents/carers could see them.

Staff should take care with their use of social media and use of email (see section 5.1.2) to protect themselves online and avoid compromising their professional integrity.

5.2.1 Personal social media accounts

Members of staff should ensure that their use of social media, either for work or personal purposes, is appropriate at all times.

The school has guidelines for staff on appropriate security settings for Facebook accounts (see Appendix 1).

5.3 Remote access

We allow staff to access the school's ICT facilities and materials remotely.

All staff can use emails via Outlook from home. The SBM will provide passwords.

All staff can use Onedrive to share documents securely.

Staff accessing the school's ICT facilities and materials remotely must abide by the same rules as those accessing the facilities and materials on-site. Staff must be particularly vigilant if they use the school's ICT facilities outside the school and take such precautions as the SBM and head teacher may require from time to time against importing viruses or compromising system security.

Our ICT facilities contain information which is confidential and/or subject to data protection legislation. Such information must be treated with extreme care and in accordance with our data protection policy.

The data protection policy can be found on the school website.

5.4 School social media accounts

The school has no social media account.

The School Association does use Facebook, X and WhatsApp for communication and this is not an official form of communication for staff in school. The school takes no active participation on this platform.

5.5 Monitoring and filtering of the school network and use of ICT facilities

To comply with Department for Education (DfE) guidance on [meeting digital and technology standards](#), and to safeguard and promote the welfare of children and provide them with a safe environment to learn, the school reserves the right to filter and monitor the use of its ICT facilities and network. This includes, but is not limited to, the filtering and monitoring of:

- › Internet sites visited
- › Bandwidth usage
- › Email accounts
- › Telephone calls
- › User activity/access logs
- › Any other electronic communications

Only authorised ICT personnel may filter, inspect, monitor, intercept, assess, record and disclose the above, to the extent permitted by law.

The school reserves the right to retrieve the contents of email messages or to check internet usage (including pages visited and searches made) as reasonably necessary in the interests of the school, including for the following purposes:

- › To monitor whether the use of the email system or the internet is legitimate and in accordance with this policy
- › To find lost messages or retrieve messages lost due to computer failure
- › To help in the investigation of alleged wrongdoing
- › To comply with any legal obligation

The list above is not exhaustive.

The school monitors ICT use in order to:

- › Investigate compliance with school policies, procedures and standards

- › Ensure effective school and ICT operation
- › Conduct training or quality control exercises
- › Prevent or detect crime
- › Comply with a subject access request, Freedom of Information Act request, or any other legal obligation

Our governing board is responsible for making sure that:

- › The school meets the DfE's filtering and monitoring standards
- › Appropriate filtering and monitoring systems are in place
- › Staff are aware of those systems and trained in their related roles and responsibilities
 - For the leadership team and relevant staff, this will include how to manage the processes and systems effectively and how to escalate concerns
- › It regularly reviews the effectiveness of the school's monitoring and filtering systems

The school's designated safeguarding lead (DSL) will take lead responsibility for understanding the filtering and monitoring systems and processes in place.

Where appropriate, staff may raise concerns about monitored activity with the school's DSL and ICT manager, as appropriate.

6. Pupils

6.1 Access to ICT facilities

- › The pupils have access to laptops and networked computers in the classroom.
- › Specialist ICT equipment, such as that used for music or design and technology must only be used under the supervision of staff.

6.2 Search and deletion

Under the Education Act 2011, and in line with the Department for Education's [guidance on searching, screening and confiscation](#), the school has the right to search pupils' phones, computers or other devices for pornographic images or any other data or items banned under school rules or legislation. In St Andrew's mobile phones are only allowed in year 5 & 6 – with clear rules and expectations. The school reserves the right to remove this privilege if a child is in breach of the rules.

The school can, and will, delete files and data found on searched devices if we believe the data or file has been, or could be, used to disrupt teaching or break the school's rules.

6.3 Unacceptable use of ICT and the internet outside of school

The school will sanction pupils, in line with our Behaviour & Relationships Policy, if a pupil engages in any of the following **at any time** (even if they are not on school premises):

- › Using ICT or the internet to breach intellectual property rights or copyright
- › Using ICT or the internet to bully or harass someone else, or to promote unlawful discrimination
- › Breaching the school's policies or procedures
- › Any illegal conduct, or making statements which are deemed to be advocating illegal activity
- › Accessing, creating, storing, linking to or sending material that is pornographic, offensive, obscene or otherwise inappropriate

- › Consensual or non-consensual sharing of nude and semi-nude images and/or videos and/or livestreams (also known as sexting or youth produced sexual imagery)
- › Activity which defames or disparages the school, or risks bringing the school into disrepute
- › Sharing confidential information about the school, other pupils, or other members of the school community
- › Gaining or attempting to gain access to restricted areas of the network, or to any password-protected information, without approval from authorised personnel
- › Allowing, encouraging, or enabling others to gain (or attempt to gain) unauthorised access to the school's ICT facilities
- › Causing intentional damage to the school's ICT facilities or materials
- › Causing a data breach by accessing, modifying, or sharing data (including personal data) to which a user and/or those they share it with are not supposed to have access, or without authorisation
- › Using inappropriate or offensive language

7. Parents/carers

7.1 Access to ICT facilities and materials

Parents/carers do not have access to the school's ICT facilities as a matter of course.

However, parents/carers working for, or with, the school in an official capacity (for instance, as a volunteer or as a member of the PTA) may be granted an appropriate level of access, or be permitted to use the school's facilities at the headteacher's discretion.

Where parents/carers are granted access in this way, they must abide by this policy.

7.2 Communicating with or about the school online

We believe it is important to model for pupils, and help them learn, how to communicate respectfully with, and about, others online.

Parents/carers play a vital role in helping model this behaviour for their children, especially when communicating with the school through our website and social media channels.

We ask parents/carers to sign the agreement in appendix 1.

7.3 Communicating with parents/carers about pupil activity

The school will ensure that parents and carers are made aware of any online activity that their children are being asked to carry out.

When we ask pupils to use websites or engage in online activity, we will communicate the details of this to parents/carers in the same way that information about homework tasks is shared.

In particular, staff will let parents/carers know which (if any) person or people from the school pupils will be interacting with online, including the purpose of the interaction.

Parents/carers may seek any support and advice from the school to ensure a safe online environment is established for their child.

8. Data security

The school is responsible for making sure it has the appropriate level of security protection and procedures in place to safeguard its systems, staff and learners. It therefore takes steps to protect the security of its computing resources, data and user accounts. The effectiveness of these procedures is reviewed periodically to keep up with evolving cyber crime technologies.

Staff, pupils, parents/carers and others who use the school's ICT facilities should use safe computing practices at all times. We aim to meet the cyber security standards recommended by the Department for Education's guidance on [digital and technology standards in schools and colleges](#), including the use of:

- › Firewalls
- › Security features
- › User authentication and multi-factor authentication
- › Anti-malware software

8.1 Passwords

All users of the school's ICT facilities should set strong passwords for their accounts and keep these passwords secure.

Users are responsible for the security of their passwords and accounts, and for setting permissions for accounts and files they control.

Members of staff or pupils who disclose account or password information may face disciplinary action. Parents or volunteers who disclose account or password information may have their access rights revoked.

8.2 Software updates, firewalls and anti-virus software

All of the school's ICT devices that support software updates, security updates and anti-virus products will have these installed, and be configured to perform such updates regularly or automatically.

Users should not delete, destroy or modify existing systems, programs, information or data. Users must not download or install software from external sources without authorisation from the school business manager.

Users must not circumvent or make any attempt to circumvent the administrative, physical and technical safeguards we implement and maintain to protect personal data and the school's ICT facilities.

Any personal devices using the school's network must all be configured in this way.

8.3 Data protection

All personal data must be processed and stored in line with data protection regulations and the school's data protection policy, which can be found on the school website.

8.4 Access to facilities and materials

All users of the school's ICT facilities will have clearly defined access rights to school systems, files and devices.

These access rights are managed by the school business manager.

Users should not access, or attempt to access, systems, files or devices to which they have not been granted access. If access is provided in error, or if something a user should not have access to is shared with them, they should alert the school business manager immediately.

Users should always log out of systems and lock their equipment when they are not in use to avoid any unauthorised access. Equipment and systems should always be logged out of and shut down completely at the end of each working day.

8.5 Encryption

The school makes sure that its devices and systems have an appropriate level of encryption.

School staff may only use personal devices (including computers and USB drives) to access school data, work remotely, or take personal data (such as pupil information) out of school if they have been specifically authorised to do so by the headteacher.

Use of such personal devices will only be authorised if the devices have appropriate levels of security and encryption, as defined by Turn it On (ICT service).

9. Protection from cyber attacks

Please see the glossary (appendix 5) to help you understand cyber security terminology.

The school will:

- › Work with governors and the IT department to make sure cyber security is given the time and resources it needs to make the school secure
- › Provide annual training for all users, including staff, pupils and governors (and include this training in any induction for new starters, if they join outside of the school's annual training window) on the basics of cyber security, including:
 - The methods hackers use for tricking people into disclosing personal information, including phishing
 - Online safety and password security
 - Social engineering, including not using websites that host unsuitable material, and could also contain malware and viruses
 - The physical security of devices, for example not leaving a laptop unlocked and unattended
 - The risks of using removable storage media, such as USBs
 - Multi-factor authentication
 - How and when to report a cyber incident or attack
 - How and when to report a data breach
 - Data protection for all staff. Staff who are exposed to higher-risk data will have more frequent training
 - How to check the sender address in an email
 - How to respond to a request for bank details, personal information or login details
 - How to verify requests for payments or changes to information
- › Make sure staff are aware of its procedures for reporting and responding to cyber security incidents
- › Investigate whether our IT software needs updating or replacing to be more secure
- › Not engage in ransom requests from ransomware attacks, as this would not guarantee recovery of data
- › Put controls in place that are:
 - **Proportionate:** the school will verify this using a third-party audit annually (such as [360 degree safe](#)) to objectively test that what it has in place is effective
 - **Multi-layered:** everyone will be clear on what to look out for to keep our systems safe
 - **Up to date:** with a system in place to monitor when the school needs to update its software
 - **Regularly reviewed and tested:** to make sure the systems are as effective and secure as they can be
- › Back up critical data and store these backups on cloud-based backup systems that aren't connected to the school network and which can be stored off the school premises
- › Delegate specific responsibility for maintaining the security of our management information system (MIS) to Turn it On (ICT provider).
- › Make sure staff:
 - Dial into our network using a virtual private network (VPN) when working from home
 - Enable multi-factor authentication where they can, on things like school email accounts
 - Store passwords securely using a password manager
- › Make sure ICT staff conduct regular access reviews to make sure each user in the school has the right level of permissions and admin rights

- › Make sure all necessary firewalls are in place and switched on (and that all areas of the network are secured effectively)
- › Make sure effective cyber breach prevention measures and processes are in place, e.g. endpoint detection and response systems
- › Check that its supply chain is secure, for example by asking suppliers about how secure their business practices are and checking if they have the [Cyber Essentials](#) (or a similarly effective and recognised) certification
- › Conduct a cyber risk assessment at least annually, and revisit it every term, or after a significant event has occurred

10. Internet access

The school wireless internet connection is secured.

We use wifi filtering.

We have separate filtering systems for pupils and staff.

Parents and public cannot access our systems at all.

Be aware filters aren't fool-proof. If you need to report inappropriate sites that the filter hasn't identified please contact the office team who will report it to Turn It On.

10.1 Pupils

Wifi is available via school devices with full filtering enabled.

10.2 Parents/carers and visitors

Parents/carers and visitors to the school will not be permitted to use the school's WiFi unless specific authorisation is granted by the headteacher.

The headteacher will only grant authorisation if:

- › Parents/carers are working with the school in an official capacity (e.g. as a volunteer or as a member of the PTA)
- › Visitors need to access the school's WiFi in order to fulfil the purpose of their visit (for instance, to access materials stored on personal devices as part of a presentation or lesson plan)

Staff must not give the WiFi password to anyone who is not authorised to have it. Doing so could result in disciplinary action.

11. Monitoring and review

The headteacher and ICT manager/network manager/SBM will monitor the implementation of this policy, including ensuring that it is updated to reflect the needs and circumstances of the school.

This policy will be reviewed every 2 years.

The governing body will review every 2 years. The governing board is responsible for approving this policy.

12. Related policies

This policy should be read alongside the school's policies on:

- online safety
- safeguarding and child protection
- behaviour
- staff code of conduct
- data protection.

Appendix 1: Facebook 'cheat sheet' for staff

Don't accept friend requests from pupils on social media

10 rules for school staff using personal Facebook accounts

1. Change your display name – use your first and middle name, use a maiden name, or put your surname backwards instead.
2. Change your profile picture to something unidentifiable, or if not, ensure that the image is professional.
3. Check your privacy settings regularly.
4. Be careful about tagging other staff members in images or posts.
5. Don't share anything publicly that you wouldn't be just as happy showing your pupils.
6. Don't use social media sites during school hours.
7. Don't make comments about your job, your colleagues, our school or your pupils online – once it's out there, it's out there.
8. Don't associate yourself with the school on your profile (e.g. by setting it as your workplace, or by 'checking in' at a school event).
9. Don't link your work email address to your social media accounts. Anyone who has this address (or your personal email address/mobile number) is able to find you using this information.
10. Consider uninstalling the Facebook app from your phone. The app recognises wifi connections and makes friend suggestions based on who else uses the same wifi connection (such as parents or pupils).

Check your privacy settings

- › Change the visibility of your posts and photos to **'Friends only'**, rather than 'Friends of friends'. Otherwise, pupils and their families may still be able to read your posts, see things you've shared and look at your pictures if they're friends with anybody on your contacts list.
- › Don't forget to check your **old posts and photos** – go to bit.ly/2MdQXMN to find out how to limit the visibility of previous posts.
- › The public may still be able to see posts you've **'liked'**, even if your profile settings are private, because this depends on the privacy settings of the original poster.
- › **Google your name** to see what information about you is visible to the public.
- › Prevent search engines from indexing your profile so that people can't **search for you by name** – go to bit.ly/2zMdVht to find out how to do this.
- › Remember that **some information is always public**; your display name, profile picture, cover photo, user ID (in the URL for your profile), country, age range and gender.

What do to if...

A pupil adds you on social media

- In the first instance, ignore and delete the request. Block the pupil from viewing your profile.
- Check your privacy settings again, and consider changing your display name or profile picture.
- If the pupil asks you about the friend request in person, tell them that you're not allowed to accept friend requests from pupils and that if they persist, you'll have to notify senior leadership and/or their parents. If the pupil persists, take a screenshot of their request and any accompanying messages.
- Notify the senior leadership team or the headteacher about what's happening.

A parent adds you on social media

- It is at your discretion whether to respond. Bear in mind that:
 - responding to one parent's friend request or message might set an unwelcome precedent for both you and other teachers at the school
 - pupils may then have indirect access through their parent's account to anything you post, share, comment on or are tagged in.
- If you wish to decline the offer or ignore the message, consider drafting a stock response to let the parent know that you're doing so.

You're being harassed on social media, or somebody is spreading something offensive about you

- **Do not** retaliate or respond in any way.
- Save evidence of any abuse by taking screenshots and recording the time and date it occurred.
- Report the material to Facebook or the relevant social network and ask them to remove it.
- If the perpetrator is a current pupil or staff member, our mediation and disciplinary procedures are usually sufficient to deal with online incidents.
- If the perpetrator is a parent or other external adult, a senior member of staff should invite them to a meeting to address any reasonable concerns or complaints and/or request they remove the offending comments or material.
- If the comments are racist, sexist, of a sexual nature or constitute a hate crime, you or a senior leader should consider contacting the police.

Appendix 2: Acceptable use of the internet: agreement for parents/carer & child

Online Safety Statement

This statement and agreement form is part of the school's enrolment/admissions agreement signed in Reception.

All children in Key Stage 2 will revisit this agreement as part of their curriculum for online safety.

Parents/carers and children will be asked to re-sign.

At St Andrew's C of E Primary School we recognise that:

- it is important for children to use the internet for education and also for entertainment and personal development;
- we have a duty – shared with parents – to teach children to use the internet responsibly;
- safeguards need to be in place to ensure that children are kept safe online (this includes filtering and monitoring to ensure when the internet is accessed, it is safe for children);
- families vary in their attitude to the adoption of electronic devices between the ages of 5 and 11;
- we have a duty to control the use of children's personal devices in school.

Taking all these points into account, for pupils at St Andrew's C of E Primary School, the use of personal devices with the capacity to store and/or transfer data and those which connect to the internet is prohibited. This includes, but is not restricted to, items such as electronic toys, tablets, watches, phones, laptops and computers.

This agreement is part of our overarching code of behaviour (behaviour and relationships policy) and it fits within our Child Protection and Safeguarding Policy and our Online Safety Policy.

Children: Please read the following agreement and discuss it with your parents/carers.

Parents/Carers: Please read and discuss this agreement with your child and then sign it, ask your child to sign it, and return it to the class teacher.

Online Safety Agreement

These points relate to my use of devices in school.

- Any device (e.g. smart phone, smart watch) that I carry with me to and from school, I will give to the teacher in school on arrival. It will be stored safely and returned to me at the end of the school day. I will not use this device on school grounds (either before I've handed it in or after I've picked it up). My online behaviour will meet the points below.
- I will have a laptop assigned for my use in class. I will not damage this laptop. Any deliberate damage incurred may result in a charge for replacement. My online behaviour will meet the points below.

These points relate to all my online behaviour, at home and at school.

- I will be responsible for my behaviour on educational sites, social media platforms, games and apps.
- I will not deliberately browse, download or upload any material which could be thought offensive or illegal. If I come across any of this material I will immediately tell my trusted adult.
- I will not communicate with anyone in a way that could be thought threatening, bullying or offensive.
- I will not send anyone material that could be thought threatening, bullying, offensive or illegal.
- I will not give out any personal information online, such as my name, phone number or address.
- I will not send any photos of myself or anyone else without first checking with my parent / carer or teacher.
- I will not reveal my passwords to anyone apart from my parent or my teacher.
- I will not arrange to meet anyone I know online without discussing this with my parent/ carer or teacher. If I am worried about anything I see or hear online, or if anything doesn't feel right, I know I can talk to someone about it.

My trusted adults are:

I understand that my internet use at St Andrew's will be monitored and logged and can be made available to my teacher, the Headteacher and my parent/carer.

I understand these rules are designed to keep me safe.

Pupil signature (date) _____

We have discussed this Online Safety Agreement and _____ [child's name]
agrees to follow the rules set out above.

Parent/carer signature (date) _____

Appendix 3: Acceptable use agreement for staff, governors, volunteers and visitors

Acceptable use of the school's ICT facilities and the internet: agreement for staff, governors, volunteers and visitors

Name of staff member/governor/volunteer/visitor:

When using the school's ICT facilities and accessing the internet in school, or outside school on a work device, I will not:

- Access, or attempt to access inappropriate material, including but not limited to material of a violent, criminal or pornographic nature (or create, share, link to or send such material)
- Use them in any way which could harm the school's reputation
- Access social networking sites or chat rooms
- Use any improper language when communicating online, including in emails or other messaging services
- Install any unauthorised software, or connect unauthorised hardware or devices to the school's network
- Share my password with others or log in to the school's network using someone else's details
- Share confidential information about the school, its pupils or staff, or other members of the community
- Access, modify or share data I'm not authorised to access, modify or share
- Promote private businesses, unless that business is directly related to the school

I understand that the school will monitor the websites I visit and my use of the school's ICT facilities and systems.

I will take all reasonable steps to ensure that work devices are secure and password-protected when using them outside school, and keep all data securely stored in accordance with this policy and the school's data protection policy.

I will let the designated safeguarding lead (DSL) and ICT manager know if a pupil informs me they have found any material which might upset, distress or harm them or others, and will also do so if I encounter any such material.

I will always use the school's ICT systems and internet responsibly, and ensure that pupils in my care do so too.

Signed (staff member/governor/volunteer/visitor):

Appendix 5: Glossary of cyber security terminology

These key terms will help you to understand the common forms of cyber attack and the measures the school will put in place. Many of these terms are from the National Cyber Security Centre (NCSC) [glossary](#).

TERM	DEFINITION
Antivirus	Software designed to detect, stop and remove viruses and other kinds of malicious software.
Breach	When your data, computer systems or networks are accessed or affected without authorisation.
Cloud	An on-demand, massively scalable service, hosted on a shared infrastructure where you can store and access your resources (including data and software) via the internet, instead of locally on physical devices.
Cyber attack	An attempt to access, damage or disrupt your computer systems, networks or devices maliciously.
Cyber incident	Any event that threatens the confidentiality, integrity, or availability of data within your computer network, or where the security of your system or service has otherwise been breached.
Cyber security	The protection of your devices, services and networks (and the information they contain) from unauthorised theft or damage.
Download attack	Where malicious software or a virus is downloaded unintentionally onto a device without the user's knowledge or consent.
Firewall	Hardware or software that uses a defined rule set to constrain network traffic – this is to prevent unauthorised access to or from a network.
Hacker	Someone who uses their technology skills to gain unauthorised access to computers, systems and networks.
Malware	Malicious software. Any kind of software that can damage computer systems, networks or devices, which includes viruses, trojans or any code or content that is harmful.
Patching	Updating firmware or software to improve security and/or enhance functionality.
Pentest	Short for penetration test. This is an authorised test of a computer network or system to look for security weaknesses with the end aim of fixing them.

TERM	DEFINITION
Pharming	An attack on your computer network that means users are redirected to a wrong or illegitimate website even if they type in the right website address.
Phishing	Untargeted, mass emails or text messages sent to many people asking for sensitive information (such as bank details or passwords) or encouraging them to visit a fake website.
Ransomware	Malicious software that stops you from using your data or systems, usually by encrypting your files, until you make a payment (a ransom) for decryption.
Social engineering	Manipulating people into giving information or carrying out specific actions that's of use to an attacker.
Spear-phishing	A more targeted form of phishing where an email is designed to look like it's from a person the recipient knows and/or trusts.
Trojan	A type of malware/virus designed to look like legitimate software that can be used to hack a victim's computer.
Two-factor/multi-factor authentication	Using 2 or more different components to verify a user's identity.
Virus	Programmes designed to self-replicate and infect legitimate software programs or systems.
Virtual private network (VPN)	An encrypted network which allows remote users to connect securely.
Whaling	Highly-targeted phishing attacks (where emails are made to look legitimate) aimed at senior people in an organisation.
